

Web de Venta de recursos musicales (Beats, Bases, Samples)

Oportunidades:

Tipo nuevo de modelo de Ecommerce, donde el usuario tiene la posibilidad de escuchar y probar el producto que decide comprar via la web y este producto se entrega via descarga.

Un modelo no explotado en Latam ya que la gran mayoria de las paginas estan targeteadas a gente del hemisferio norte con precios dolarizados y con la industria musical propia de esas zonas. Nueva oportunidad de negocio.

Proyecto innovador, con una buena cantidad de otras paginas que ayudan a marcar el camino de hacia donde ir. Con retos nuevos e interesantes.

Estos modelos de pagina comparten esquema con los ecommerce mas tradicionales, como la solicitud de registro a la pagina, algunas ofrecen suscripciones mensuales, las funciones de carrito e incluso filtros en cuanto los generos de los productos dentro de la web

A continuacion se mostraran ejemplos de 3 tipos de paginas distintas, con sus diferencias al publico al que apuntan.

The screenshot displays the BeatStars website homepage across three different sections. The top section features a large banner with the text "OVER 2 MILLION CREATORS READY TO WORK WITH YOU!" and a "Start Selling" button. Below this are two more banners: one for releasing music to major platforms like Apple Music, Spotify, and YouTube Music, and another for browsing trending tracks and genres. The bottom section shows a search interface with a search bar, filters for genre, price, mood, instruments, and BPM, and a grid of track thumbnails.
